

CLOUD SECURITY ASSESSMENT

Take control of your cloud security and compliance

In today's digital landscape, cloud infrastructure has become the backbone of modern businesses. However, with great power comes great responsibility. As organizations increasingly rely on cloud services, the security of these environments becomes paramount. A robust cloud security assessment is not just a luxury—it's a necessity.

Security challenges

- **Evolving Threats:** Cybersecurity threats are constantly evolving, targeting cloud environments with sophisticated attacks.
- **Compliance Requirements:** Many industries face strict regulatory requirements for data protection and privacy.
- **Cost of Breaches:** Security breaches can result in significant financial losses, reputational damage, and legal consequences.
- **Complex Environments:** Multi-cloud and hybrid setups increase complexity, making it challenging to maintain consistent security measures.
- **Rapid Changes:** The dynamic nature of cloud environments requires ongoing vigilance and regular assessments.

Why choose our assessment?

Configuring public cloud environments is complex, and incorrect setups expose your organization to unnecessary risks. Our fast and effective assessment identifies potential issues quickly.

- Full insight into potential security and compliance risks
- Technical assessment using proven methodologies and frameworks
- Multi-cloud analytics: AWS, Azure, GCP, and OCI
- Identification of potentially incorrect configurations
- Benchmarking against best practices
- Tools and insights for continuous improvement
- Rapid results in a structured, prioritized report
- Actionable recommendations

Deliverables

A comprehensive, structured report tailored for various decision-makers, including:

- Clear executive summary
- Detailed recommendations
- Quick-to-implement fixes

About CloudNation

- Born in the cloud in 2018
- 3 Offices in the Netherlands
- 50+ dedicated consultants
- 500+ happy customers
- 40% year on year growth

Our Cloud Expertise

- 25+ Cloud Specializations
- 150+ Cloud Certifications
- Deep partnerships with AWS and Microsoft

"Cloud security is always mentioned as one of the biggest mountains organizations have to scale to realize their cloud ambitions. But do not worry, we can scale that mountain together."

Erik Snijder
Cloud Security Consultant
