

SLASH YOUR CLOUD COSTS

Unlock hidden savings in your cloud with CloudNation

Is your organization facing unexpected cloud expenses? You're not alone. Modern cloud technologies use a different pricing model (OPEX) than traditional IT (CAPEX). When introducing cloud technology within an organization, this shift in cost responsibility can challenge IT teams. Default Cloud configurations are not always optimized for cost-efficiency. But what if we told you that your cloud could be a treasure trove of untapped savings?

Cut your cloud costs with CloudNation 🇪🇺

Navigate the cloud cost maze with our expert guidance. In just **two weeks**, we'll chart a course to significant savings with our tailored report. **How significant?** Our clients have discovered hidden treasures of **up to \$50,000** in annual savings – all with just a few days of optimization work!

The savings expedition

Together, we'll embark on a journey to optimize your cloud expenditure, exploring:

1. **Saving Plans:** Analyze where possible savings can be made using Saving Plans & Reservations – leveraging long-term commitments for discounts up-to 72%.
2. **FinOps:** Health-check of current cost optimization processes.
3. **Right-sizing:** Check where over-provisioned resources can be reduced.
4. **Waste elimination:** Identify unused assets for removal. Reducing your footprint is beneficial on multiple levels: it reduces security needs, carbon footprint and reduces direct costs.

After conducting our analysis, we'll provide you with a detailed report outlining actionable cost-saving strategies and potential savings.

Don't let another dollar float away in the cloud. In just 14 days, we'll deliver a comprehensive analysis to help you reduce costs and maximize your cloud investment—all for just €5000.*

Ready to start your savings adventure?

- Subject to a detailed scope

- 500+ happy customers
- 40% year on year growth

Our Cloud Expertise

- 25+ Cloud Specializations
- 150+ Cloud Certifications
- Deep partnerships with AWS and Microsoft

"The initial excitement of cloud migration can be dampened by ballooning cloud bills. You, as a stakeholder or decision maker, need a clear understanding of your cloud environment to optimize spending and ensure the cloud remains a cost-effective advantage."

Renz Gerards
FinOps Expert
